

Pre-Finished

THERMALLY MODIFIED WOOD RAINSCREEN & SLATTING

- Sizes: 1"x 2" | 1"x 4"
- Lengths: 6' - 16'
- Wood: Yellow Pine
- Grade: D&Better
- Texture: Smooth
- Finish:
CUTEK® Extreme
Color-Clear, All Sides
- Customizations
available

Why ThermaPro Wood

Stable & Solid

Expansion and contraction reduced up to 60%. Resists warping, cupping.

Eco-Friendly

Non-toxic, chemical free process brings out the natural beauty of wood. Fully sustainable building material.

Decay Resistant

Less water absorption means a higher resistance to rot, mold and decay.

Pre-Finished

Pre-Oiled all sides with Cutek Extreme Clear. UV additives available to retain initial wood color.

Rated for all climates & exterior applications
100% solid wood design
No warping, splitting or swelling

Profile: E4E

Species: S. Yellow Pine

Finishing:

- CUTEK® Extreme CD50
- Clear

Customizations:

- 6 Custom Colortones
- Custom sizes

Manufacturer:

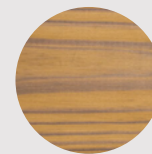

PRE-FINISHING

CUTEK® Extreme Wood Preservative is a high-performance oil based wood stabilizer that penetrates deep into the wood to minimize warping, cupping and splitting. Clear Cutek slows the silvering process. Custom UV protectant Colortones help retain wood coloring. Maintenance coats every 5 years will restore and/or maintain wood coloring.
