Color-Clear All Sides

WHY THERMAPRO WOOD DECKING

Stable & Solid

Expansion and contraction reduced up to 60%. Resists warping, cupping.

Eco-Friendly

Non-toxic, chemical free thermal modification process improves durability and brings out its natural beauty.

Decay Resistant

Less water absorption means a higher resistance to rot, mold and decay.

Pre-Finished

Pre-Oiled all sides with Cutek Extreme Clear. UV additives available to retain initial wood color.

Rated for all climates & exterior applications
Chemical-Free
No warping, splitting or swelling
